EXPERIENCE

Junglee Games by Flutter Entertainment, Gurgaon

SDE-II Frontend | Jul 2024 – Present

Tech Stack- React.js, JavaScript, HTML, CSS

- **Managed multiple high-traffic gaming platforms simultaneously** including Jungleerummy.com, Rummy.com, Jungleepoker.com, Pokerstars.in, Jungleeludo.com, Howzat.com, Junglee11.com, Carromstars.com, and Jungleeteenpatti.com, ensuring optimal performance, user engagement, and feature delivery across diverse product lines.
- Spearheaded the development and deployment of a cross-platform scratch card feature, achieving and maintaining **critical business KPIs**.
- Engineered IPL and World Cup features, optimizing **UI performance** through caching strategies, delivered under stringent timelines.
- Orchestrated the creation of a **Teenpatti redemption store**, enabling seamless purchases of Amazon vouchers, t-shirts, and exclusive offers using Teenpatti wallet chips, significantly enhancing user engagement and revenue.
- Innovated reusable components such as carousels, testimonials, and leaderboards for the Junglee project, ensuring scalability and efficiency in development.
- Implementing **Page optimization** techniques such as lazy loading, code splitting, and image optimization for improved performance.
- Developing with React.js and Redux, focusing on state management to create dynamic and interactive user interfaces.
- Demonstrating expertise in Git and version control.

SDE-I Frontend | Nov 2022 – Jun 2024

Tech Stack- React.js, JavaScript, HTML, CSS

- Implemented **ReactJs-based** dashboards for bonus code generation, triggering personalized birthday/anniversary mailers, and providing detailed user data tracking for product team insights.
- Conducted **A/B testing** on promotional campaigns and user quests, ensuring iterative improvements based on user behavior and feedback.
- Developed **Python scripts** for generating **SEO performance** score mail alerts, enhancing monitoring capabilities and reporting efficiency.
- Automated server management operations using **Python scripts,** optimizing memory utilization, monitoring **CPU usage alerts**, and automating backup procedures with defined validity periods.

OneBanc Technologies, Gurgaon
Associate Front-End Developer | *Oct 2021 – Nov 2022*

Tech Stack- React.js, JavaScript, HTML, CSS

- Led the development of a secure customer onboarding screens in collaboration with partner banks, ensuring the confidentiality of sensitive customer data such as Aadhar, PAN, and MPIN.
- Engineered OneBanc's specialized salary calculator on **ReactJS,** enabling precise tax deductions to determine the final in-hand salary for end customers.
- Designed a responsive company website featuring five screens with captivating animations, adhering to **UI specifications** and enhancing overall user experience.
- Optimized webpage performance by implementing techniques like lazy loading, script and style file minification, and other optimization strategies.
- Collaborated closely with iOS and Android teams to optimize WebView functionality within their respective applications, ensuring consistent user experience across platforms.
